Zoning Final

Solar Electrical

Required Inspections:
Structural Solar Final
Electrical Rough
Electrical Solar Final
Zoning Final

Solar Hybrid

Required Inspections:
Structural Solar Final
Electrical Rough
Electrical Solar Final
Plumbing Solar Final
Zoning Final

Owner Notification:

Installation of roof mounted photovoltaic or solar support systems typically require roof system penetrations to allow attachment to the structure which may create additional long-term roof system maintenance requirements and/or jeopardize roof system manufacturer's warranties. Roof mounted solar systems generally required removal and reinstallation of solar panels/arrays in order to perform routine roof system maintenance, repair or replacement.

I hereby acknowledge that I have read and understand the above notification on this _____ day of _____, 20_____.
